

Andrew Ambuka

Nairobi, Kenya | +254 115 781276 | andrewambuka9@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Software Engineer experienced in building scalable backend systems, modern web platforms, and cross-platform mobile applications using FastAPI, React, Next.js, React Native, PostgreSQL, and Docker. Skilled in API design, database optimization, CI/CD automation, and developing responsive user-focused applications.

EXPERIENCE

Software Engineer — SokoFresh | Nairobi, Kenya | Oct 2025 – Present

- Designed and implemented multi-tenant backend systems powering SokoPay and Inventory platforms.
- Built production-scale REST APIs handling secure financial and operational workflows.
- Developed responsive internal dashboards and operational interfaces using React and Next.js.
- Implemented Redis caching reducing API latency by 40%.
- Optimized PostgreSQL indexing and queries improving throughput and system reliability.
- Led Dockerized CI/CD pipelines via GitHub Actions; increased test coverage from 0% to 85%.

Software Engineer Intern — SokoFresh | Mar 2025 – Oct 2025

- Developed production-ready full-stack features using FastAPI, Node.js, and React.
- Integrated frontend applications with backend APIs for operational and financial workflows.
- Automated reconciliation workflows reducing manual operational overhead.
- Contributed to containerized deployments and production stability improvements.

SELECTED PROJECTS

SokoPay System — [View Project](#)

Contributed to full-stack payment processing systems, including financial APIs and user-facing operational interfaces. Built and maintained backend services supporting secure transaction processing and business workflows. Integrated frontend components with backend services to support payment and operational flows.

Inventory Management System — [View Project](#)

Developed full-stack inventory workflows and operational dashboards. Improved backend performance through optimized database queries and caching. Implemented monitoring and reliability improvements for inventory operations.

SaaS Platforms (Agrimmerce & Case Management) — [GitHub Repository](#)

Built SaaS marketplace for farmers with optimized search, media storage, encrypted document communication, and clean service-layer architecture.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL

Backend: FastAPI, Django, Flask, Node.js, Next.js, Nest.js, REST APIs, Microservices

Frontend: React, Next.js, Tailwind CSS

Databases: PostgreSQL (Indexing, Query Optimization), MongoDB, Redis (Caching)

Cloud & DevOps: Docker, Kubernetes, GitHub Actions, CI/CD, AWS, GCP

Architecture: Distributed Systems, Multi-Tenancy, RBAC, System Design

EDUCATION

BSc. Computer Science (Second Class Upper Division) - The Presbyterian University of East Africa

Software Engineering - Moringa School (Sept 2024 – July 2025)

AI Career Essentials - ALX

Kubernetes and Cloud Native Associate - Andela and Linux Foundation (May 2025-October 2025)
